

GVEC.net Website Changes

GVEC has a rich heritage, but we also value a modern lifestyle like one that employs the latest technology — which is why GVEC.net’s website is being transformed! It will be a smarter, more modernized website that streamlines the content and navigation so you’ll have instant access to email, account information, and new plan and pricing information.

Here’s a look at just a few of the new features:

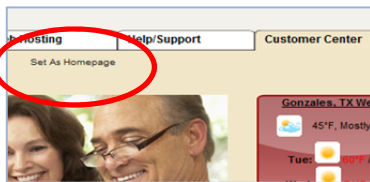

New Home Page

The home page offers easier navigation through the site, “instant chat” with a GVEC.net representative, one-click access to the Customer Center page and quick access to our available Internet plans and pricing.

Customer Center

The new personalized page is just one click away from the home page. By clicking on the “Customer Center” tab or the “Existing Customer?” icon, you will have access to all of your favorite news, shopping, financial, and social media sites — all on one page. This page is customizable allowing you to select or add links to appear on your page.

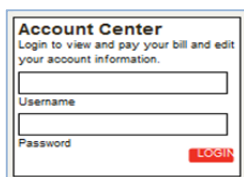

Set As Home Page

You can bypass the home page by simply setting the Customer Center as your web browser’s home page. We’ve made it easy by adding a “Set as Home Page” link. With one click, the GVEC.net Customer Center page will open every time you open your web browser.

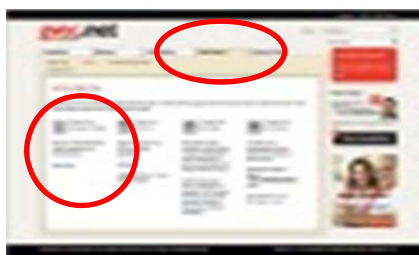

More Convenient Webmail Access

A new log in area on the Customer Center is an easier, faster way for you to get to your email so you won’t miss a thing.

Instant Account Access

The one-step login from the Customer Center gives you instant access to your account information so you can quickly pay your bill, create a new email address, view your usage, change your password, and more.

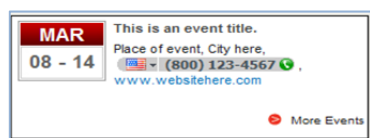

Enhanced Support

Answers to GVEC.net questions are now in one, easy-to-use library of tutorials and frequently asked questions.

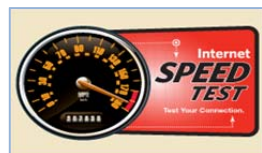

Stay Connected with Friends and Family

By adding quick links to your Facebook, Twitter, Flickr and other social media sites, you can easily stay connected to what's happening among your friends and family.

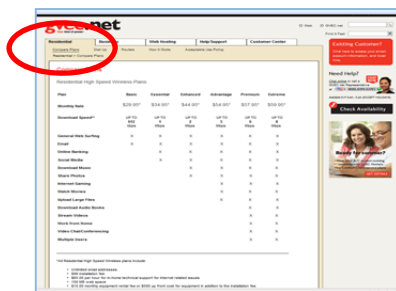

Know What's Happening in the Community

Staying connected to what's happening in the community is easy with the Community Calendar. You can submit details on an upcoming event and GVEC.net will post it upon approval.

Check Internet Speed

You can instantly measure how fast your computer uploads and downloads data to and from the Internet with our Internet Speed Test.

Upgrade Service

If you want to increase your speed, you can instantly compare plans by clicking on "Compare Plans" from the home page. The side-by-side comparison can help you decide which plan fits your budget and online needs.

Check Availability

GVEC.net's coverage area is easy to locate with the "Check Availability" link on the home page. You can view a map highlighting the areas where GVEC.net high-speed Internet service is available.

Need Help?

Our new, live online chat feature connects you instantly with a GVEC.net representative that can help answer your service or technical questions. Of course, you can still call or email for assistance!
